Service profiles.

Systems for trenchless partial sewer rehabilitation

Schwalm Robotic GmbH manufactures robotic systems and special vehicles for trenchless sewer rehabilitation. The range of applications of the systems comprises main line and house connection sewer rehabilitation, video diagnostics to determine damage, and image documentation. Robots, equipment, and sewer rehabilitation vehicles are proprietary developments of Schwalm and are protected by patent

Pipeline, sewer and industrial services

Schwalm Kanalsanierung is specialized in sewer cleaning, disposal of cleaning residues from cesspool drainage work and grease separator service, TV inspection of sewers, as well as in partial relining procedures within the frame work of trenchless rehabilitation of main lines and house connection sewers.
